# INPUT LOOP POWERED ISOLATOR

**MODEL** 

M<sub>2</sub>SN

## **BEFORE USE ....**

Thank you for choosing us. Before use, please check contents of the package you received as outlined below. If you have any problems or questions with the product, please contact our sales office or representatives.

### **■ PACKAGE INCLUDES:**

Signal conditioner (body + base socket).....(1)

#### ■ MODEL NO.

Confirm Model No. marking on the product to be exactly what you ordered.

#### **■INSTRUCTION MANUAL**

This manual describes necessary points of caution when you use this product, including installation, connection and basic maintenance procedures.

# **POINTS OF CAUTION**

### ■ NONINCENDIVE APPROVAL OPTION

- This equipment is suitable for use in Class I, Div. 2, Groups A, B, C and D or Non-Hazardous Locations only.
- WARNING! Before You Remove the Unit from Its Base Socket or Mount It, Turn Off the Power Supply and Input Signal for Safety.
- WARNING! Explosion Hazard Substitution of Components May Impair Suitability for Class I, Div. 2.
- WARNING! Explosion Hazard -
- Do Not Disconnect Equipment Unless Power Has Been Switched Off or The Area is Known To Be Non-Hazardous.
- The equipment was evaluated for use in the ambient temperature and relative humidity as mentioned in 'ENVI-RONMENT' section.
- The input and output wiring must be in accordance with Class I, Div. 2 wiring methods and in accordance with the authority having jurisdiction for use in these hazardous locations.

## ■ CONFORMITY WITH EU DIRECTIVES, UK LEGISLATION OR UL

- The equipment must be mounted inside a panel.
- The actual installation environments such as panel configurations, connected devices, connected wires, may affect the protection level of this unit when it is integrated in a panel system. The user may have to review the CE/UKCA requirements in regard to the whole system and employ additional protective measures\* to ensure the CE/UKCA conformity.
  - \* For example, installation of noise filters and clamp filters for the power source, input and output connected to the unit, etc.
- Install lightning surge protectors for those wires connected to remote locations.

### **■ GENERAL PRECAUTIONS**

• Before you remove the unit from its base socket or mount it, turn off the input signal for safety.

#### **■** ENVIRONMENT

- Indoor use.
- When heavy dust or metal particles are present in the air, install the unit inside proper housing with sufficient ventilation.
- Do not install the unit where it is subjected to continuous vibration. Do not subject the unit to physical impact.
- Environmental temperature must be within -5 to +55°C (23 to 131°F) with relative humidity within 30 to 90% RH in order to ensure adequate life span and operation.
- Be sure that the ventilation slits are not covered with cables, etc.

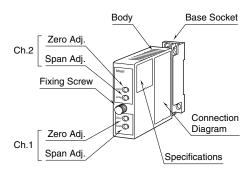

### **■** WIRING

- Do not install cables close to noise sources (relay drive cable, high frequency line, etc.).
- Do not bind these cables together with those in which noises are present. Do not install them in the same duct.

#### ■ AND ....

The unit is designed to function as soon as the input signal is supplied, however, a warm up for 10 minutes is required for satisfying complete performance described in the data sheet.

# **COMPONENT IDENTIFICATION**

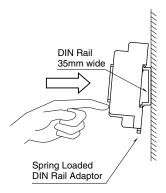

# INSTALLATION

Loosen the fixing screw at the front of the unit in order to separate the body from the base socket.

### **■ DIN RAIL MOUNTING**

Set the base socket so that its DIN rail adaptor is at the bottom. Position the upper hook at the rear side of base socket on the DIN rail and push in the lower. When removing the socket, push down the DIN rail adaptor utilizing a minus screwdriver and pull.

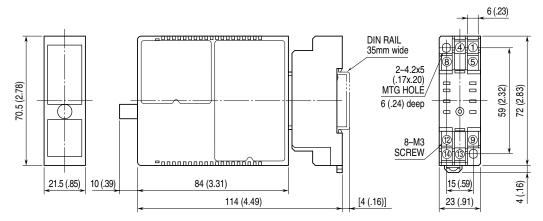

## **■ WALL MOUNTING**

Refer to "EXTERNAL DIMENSIONS."

## **TERMINAL CONNECTIONS**

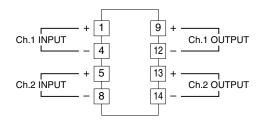

Connect the unit as in the diagram below or refer to the connection diagram on the side of the unit.

### **■ EXTERNAL DIMENSIONS** unit: mm (inch)

· When mounting, no extra space is needed between units.

### **■ CONNECTION DIAGRAM**

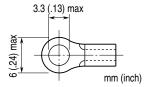

## WIRING INSTRUCTIONS

## **■ SCREW TERMINAL**

Torque: 0.8 N·m

### **■**SOLDERLESS TERMINAL

Refer to the drawing below for recommended ring tongue terminal size. Spade tongue type is also applicable. Applicable wire size: 0.25 to 1.65 mm² (AWG 22 to 16) Recommended manufacturer: Japan Solderless Terminal MFG.Co.Ltd, Nichifu Co.,ltd

## **CHECKING**

- 1) Terminal wiring: Check that all cables are correctly connected according to the connection diagram.
- Input: Check current with an ammeter. Be sure that the connected transmitter allows the load shown in the following table.

MODEL	EQUIVALENT INPUT IMPEDANCE
M2SN-xA6	$250\Omega$
M2SN-xH6	$100\Omega$
M2SN-xAA	$230\Omega$ plus output load
M2SN-xHA	$90\Omega$ plus output load × 0.16

3) Output: Check that output load is within the permissible limit shown in the following table.

MODEL	LOAD RESISTANCE
M2SN-xA6	50kΩ minimum
M2SN-xH6	50kΩ minimum
M2SN-xAA	$50 - 350\Omega$
M2SN-xHA	$50-600\Omega$

# **ADJUSTMENT PROCEDURE**

This unit is calibrated at the factory to meet the ordered specifications, therefore you usually do not need any calibration.

For matching the signal to a receiving instrument or in case of regular calibration, adjust the output as explained in the following.

## ■ HOW TO CALIBRATE THE OUTPUT SIGNAL

Use a signal source and measuring instruments of sufficient accuracy level. Turn the input signal on and warm up for more than 10 minutes.

- 1) ZERO: Apply 0% input and adjust output to 0%.
- 2) SPAN: Apply 100% input and adjust output to 100%.
- 3) Check ZERO adjustment again with 0% input.
- 4) When ZERO value is changed, repeat the above procedure 1) 3).

## **MAINTENANCE**

Regular calibration procedure is explained below:

## **■ CALIBRATION**

Warm up the unit for at least 10 minutes. Apply 0%, 25%, 50%, 75% and 100% input signal. Check that the output signal for the respective input signal remains within accuracy described in the data sheet. When the output is out of tolerance, recalibrate the unit according to the "ADJUST-MENT PROCEDURE" explained earlier.
