

Lightning Surge Protectors for Electronics Equipment M-RESTER

LIGHTNING SURGE PROTECTOR FOR ANALOG TELECOM LINE USE

(life monitor)

Functions & Features

- Designed specifically to protect telecommunication equipment from lightning surges entering through telecommunication line network
- Absorbing surges only without affecting instrumentation signal
- Life monitor function helps you to decide when you should replace the M-RESTER; reduces maintenance and prevents downtime
- LED display and alarm contact output indicate the degradation and life span of the surge protection circuits

Alarm indicators

Power: The green LED turns on while the power is supplied.

Alarm: Tricolor LED (green/amber/red)

- Remains off when the power supply is first turned on.
- Green: The unit has received one or more surges.
- Amber: Replacement is recommended.
- Red: The life span has ended.

Life time judged: When the number of discharges of the discharge element reaches the expected life span.

Alarm contact: The N.C. contact is on when the life span of the discharge elements has ended and/or when the power supply is removed.

EXTERNAL VIEW

GROUNDING

A crossover wire between M-RESTER ground and ground or metallic housing of equipment is required for protection.

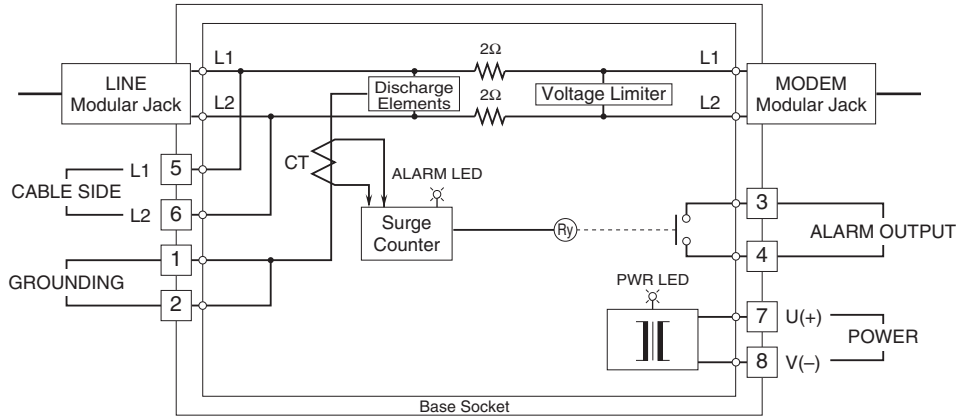

If the protected equipment has no ground terminal, ground the M-RESTER only.

EXTERNAL DIMENSIONS & TERMINAL ASSIGNMENTS unit: mm [inch]

•When mounting, no extra space is needed between units.
