

Lightning Surge Protectors for Electronics Equipment M-RESTER

LIGHTNING SURGE PROTECTOR FOR EC-CABLE USE

Functions & Features

- Designed specifically for the 32-point Transmission System EC-CABLE
- Protects the transmitter model ECT and the receiver ECR from lightning surges entering through the twisted-pair cables connecting the both modules
- Applicable to transmission systems by current loops
- Absorbs surges only without affecting instrumentation signal
- No interruption of signal by unplugging the protector element

CONNECTION EXAMPLES

GROUNDING

A crossover wire between M-RESTER ground and the ground or metallic housing of the equipment is required for protection.
 If the protected equipment has no ground terminal, ground the M-RESTER only.
 When the M-RESTER is mounted with DIN Rail Mounting Adapter, connect the grounding wire to the mounting screw of the M-RESTER.
