Configuration Mode	<ul><li>□ DIP switch setting</li><li>□ PC Configurator and communication</li></ul>	DIP switch setting	Specify setting method for system configuration, CT sensor type, CC-Link.  * DIP switch setting • Settings are changed according to DIP switch when power is turned on. • CT sensor type setting is common for all circuit. It is not available to specify except circuit 1.  * PC Configurator and communication • The setting with DIP switch is not available.
