\*2: The data range to be used is any of the following, enter “-” for both of the 0% and 100% input values.

Standard accuracy:

°C, absolute temperature: Engineering unit value × 10 (integer)

°F: Engineering unit value (integer, figures after the decimal point are rounded down)

To scale input data (e.g. scaling a 0 - 200°C value to a 0 - 10000 value), specify the 0% and 100% input values by referring to “Available range in Input Values” for the input type selected in Table 1. Make sure that the 100% input value is larger than the 0% input value.

\*3: Specify the data range. Selectable range: -32000 to +32000

The 0% and 100% input values entered are “-”, enter “-” for the 0% and 100% scaling values as well.
