端子接続図

Diagram illustrating the connection method for the M-RESTER module. The diagram shows two identical modules connected via an NTT 50bps line. Each module has a modem (モデム) and a function generator (FG) connected to its pins. The connection is as follows: Pin 3 to Modem, Pin 4 to Modem, Pin 1 to ALM (+), Pin 2 to ALM (-), Pin 5 to the other module's Pin 5, Pin 6 to the other module's Pin 6, Pin 7 to Ground, and Pin 8 to Ground. A dashed box labeled ※2 encloses pins 1 and 2, and another dashed box labeled ※2 encloses pins 4 and 5. A label ※1 points to the ground connection at pin 8.
